Companion text to Capstone Business Simulation Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. Cheating in College explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students. Orientation sessions, information on college and university websites, student handbooks that describe codes of conduct, codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiple multisite surveys, Cheating in College quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavlovich, Syracuse University

In this must-have new anthology, top media scholars explore the leading edge of digital media studies to provide a broad, authoritative survey of the study of the field and a compelling preview of future developments. This book is divided into five key areas - video games, digital images, the electronic word, computers and music, and new digital media - and offers an invaluable guide for students and scholars.

R&D Decisions, Strategy, Policy and Innovations explores how research and development decisions affect us. They are linked inextricably to the performance of firms and of economics as a whole. Their importance means that they are of concern to a large number of practitioners, policy-makers and researchers. This book demonstrates the range of issues and perspectives which R&D can encompass and at the same time identifies the elements which unite them. The papers in this book are organized into three main sections: * Strategy and Organization explores the importance of R&D and of the structures and strategies of individual organizations. The emerging 'core competence paradigm' is especially noted. * Policy and Performance looks at what strategic thinking on R&D more generally implies for government policy and the performance of industries, regions and economies. * Disclosure and the Market examines issues raised by changing regulations on the disclosure of R&D expenditure.

These fun faux matchsticks are printed with prompts and talking points that will get loved ones laughing, connecting, and playing together. A perfect way to liven up family gatherings, road trips, this colorful box of joy makes an extra-sweet gift for Mother's Day or Father's Day. Mastering the Supply Chain is an introduction to supply chain management. The book integrates theory with practice to create a cross-functional mindset in students and practitioners. It provides a wide overview of relevant supply chain concepts and sets out the challenges that need to be overcome in order to find practical ways of implementing these in a real company situation. Readers are continuously asked to actively reflect on the decisions they make, thus experiencing first-hand the many challenges that good and effective supply chain management presents. Mastering the Supply Chain presents a different way of learning that puts the reader at the center of the like situation, so that they experience the impact of every decision they make, not just in their own 'silo' but in the business. In this way, they will learn that many supply chain concepts are relatively simple to understand but not so easy to apply in reality. Chapter 6 helps students to pull everything they've learned together and see how the concepts play out in the real world by guiding them through an interactive demonstration of the course business simulation game The Fresh Connection (free access is included with the book). This is a key text for students on supply chain management BScs and MScs as well as background reading for students playing the online version of The Fresh Connection Business Simulation game. Team-Based Learning (TBL) is a unique, powerful

and proven form of small-group learning that is being increasingly adopted in higher education. Teachers who use TBL report high levels of engagement, critical thinking, and retention among their students. TBL has been used successfully in both small and large classes, in computer-supported and online classes; and because it is a form of group work that works, it has been implemented in nearly every discipline and in countries around the world. This book introduces the elements of TBL and how to apply them in the social sciences and humanities. It identifies the four essential elements of TBL – readiness assurance, design of application exercises, permanent team formation, and evaluation – and pays particular attention to the specification of learning outcomes, which can be a unique challenge in these fields. The core of the book consists of examples of how TBL has been incorporated into the teaching cultures of disciplines as varied as economics, education, literature, politics, psychology, and theatre. The authors explain why they felt a need to change how they taught and why they chose TBL. Furthermore, each chapter provides examples of the assignments and exercises they use to help their students achieve the intended learning outcomes of their courses. At a time of increasing course sizes, and emphasis on learning outcomes, this book offers the means to meet such demands while connecting students to their coursework, and stimulating their intellectual engagement. Oliver and Janet notice that something is troubling their favourite uncle, and they try to solve the mystery. They are helped by a beekeeper, who tells them wonderful stories. guides are, quite simply, like no other.' - New York Times *Best-selling guide to Morocco. Source: Nielsen BookScan. Australia, UK and USA Important Notice: The digital edition of this book may not contain all images found in the physical edition. The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of, and insight into, the IFRS convergence process from a teaching and learning perspective. Hence this book is both likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to contrast with the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing on the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those efforts. This book was originally published as a special issue of Accounting Education: An international journal.

Princess Lu knows that the throne of the Empire of the First Flame rightfully belongs to her. After all, she is the late Emperor's firstborn and has trained for the role all her life. And she can't forget her promise to shapeshifter Nok, the boy she came to love, to win justice for his now powerless people. Even with an army at her side, Lu will need to face down a major obstacle: the current sitting Empress, her once younger sister, Min. Princess Min used to live in Lu's shadow. But now she can control a powerful, ancient magic, and she's determined to use it to forge her own path and a strong future for the Empire, even if that means making enemies in court. But Min's magic isn't entirely under her control, and she must learn how to tame it before it consumes her . . . and the entire realm. Lu and Min are set for a confrontation that can't be stopped. The Empire faces threats greater than their rivalry, and even if they choose to stand together, it could cost them the throne-or their lives. »» Updated SPRING 2019! A groundbreaking, urgent report from the front lines of "dirty work"—the work that society considers essential but morally compromised. Drone pilots who carry out assassinations. Undocumented immigrants who man the "kill floors" of industrial slaughterhouses. Guardians who patrol the wards of the United States' most violent and abusive prisons. In *Dirty Work*, Eyal Press offers a paradigm-shifting view of the moral landscape of contemporary America through the stories of people who perform society's most ethically troubling jobs. As Press shows, we are increasingly shielded and distanced from an array of morally questionable activities that other, less privileged people perform in our name. The COVID-19 pandemic has drawn unprecedented attention to essential workers, and to the health and safety risks that workers in prisons and slaughterhouses are exposed. But *Dirty Work* examines a less familiar set of occupational hazards: psychological and emotional hardships such as stigma, shame, PTSD, and moral injury. These burdens fall disproportionately on low-income workers, undocumented immigrants, women, and people of color.

Illuminating the moving, sometimes harrowing stories of the people doing society's dirty work, and in so doing examining the structures of power and complicity that shape their lives, Press reveals fundamental truths about the moral dimensions of work and the hidden costs of inequality in America. There's only one way out: *Morte*. One of five houses where vampires reside as celebrities and humans are paid to be their living sacrifices. While others came here seeking fortune, I came in search of my sister who walked into Belle Morte five years ago . . . and never walked back out. Now that I'm here, the secrets about this world prove to be much darker than I ever anticipated. And lurking around every corner are shocking insinuations regarding what happened to my sister. There's only one person who might have the answers I need, and the undeniable pull I feel toward him is terrifying: Edmond Dantès—a vampire, and my mortal enemy. The harder I try to resist him, the further he pulls me under his spell. And in one instant my life is irrevocably changed. My past becomes prologue and my future becomes sealed behind these doors. Belle Morte has spoken. And it may never let me go. This proceeding volume provides a snapshot of the latest issues encountered in technical convergence and convergences of science and technology. Celebrating the achievements of Writing Across the Curriculum (WAC) by highlighting the promise of its future, this book presents 12 essays that describe how WAC programs have adapted and continue to adapt to meet new challenges. Essays in the book explain strategies for continuing WAC programs in an atmosphere of change; explore new avenues of collaboration, such as cross-institutional learning and the linked-course curricula of learning communities, and predict areas into which WAC programs need to move; and suggest new directions for research on writing across the curriculum. After a foreword by Elaine P. Maimon, essays in the book are: (1) "Writing Across the Curriculum in a Time of Change" (Susan McClod and Eric Miraglia); (2) "Accommodating Complexity: WAC Program Evaluation in the Age of Accountability" (William Condon); (3) "WAC Wired: Electronic Communication Across the Curriculum" (David Reiss and Art Young); (4) "Writing Across the Curriculum and Service Learning: Kairos, Genre, and Collaboration" (David A. Jolliffe); (5) "Is It Still WAC? Writing within Interdisciplinary Learning Communities" (Terry Myers Zawacki and Ashley Taliaferro Williams); (6) "ESL Students and WAC Programs: Varied Populations and Diverse Needs" (Ann M. Johns); (7) "The Politics of Literacy Across the Curriculum" (Vivian Villanueva); (8) "Writing Centers and WAC" (Joan A. Mullin); (9) "Curriculum-Based Peer Tutors and WAC" (Margot Soven); (10) "Writing Intensive Courses and WAC" (Martha A. Townsend); (11) "Where Do the Naturalistic Studies of WAC/WID Point? A Research Review" (David R. Russell); and (12) "Theory in WAC: Where Have We Been, Where Are We Going?" (Christopher Thaiss).
