The Congress will provide a unique topical forum to share the latest results of the metamaterials research in Europe and worldwide and bring together the engineering, physics, applied mathematics and material science communities working on artificial materials and their applications from microwaves to optical frequencies, as well as in acoustics, mechanics, hydrodynamics and thermodynamics This is a new release of the original 1929 edition. Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration?s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. An aging California vintner is determined to protect her empire from a hostile family takeover and the dark secrets that could destroy everything she loves At age seventy-four, Assaria "Sari" LeBaron is still a force to be reckoned with. For decades, she has run the Baronet Vineyards, one of California's largest and most successful wine producers, maintaining sole control even after a suspicious accident left her permanently crippled. And now, in her golden years, the formidable Sari refuses to relinquish power to her own children, a decision that has only served to increase tensions among her already emotionally damaged family members. But Sari's ambitious son, Eric, is no longer willing to play a subservient role, and has begun working behind the scenes to take over the business, forming alliances within and outside the family in his effort to dethrone the unyielding matriarch. The most difficult fight of Sari LeBaron's long and eventful life has begun; a heartbreaking struggle that will pit loved one against loved one and expose long-hidden secrets that could destroy both Sari's business and her family. The LeBaron Secret is another riveting excursion into a world of privilege that Stephen Birmingham knows intimately. It is a breathtaking tale of secrets and lies, shady double-dealings, family skeletons, and the inner turmoil of the fabulously wealthy as only the bestselling author of "Our Crowd" and The Auerbach Will could tell it. Practices of Citizenship in East Africa uses insights from philosophical pragmatism to explore how to strengthen citizenship within developing countries. Using a bottom-up approach, the book investigates the various everyday practices in which citizenship habits are formed and reformulated. In particular, the book reflects on the challenges of implementing the ideals of transformative and critical learning in the attempts to promote active citizenship. Drawing on extensive empirical research from rural Uganda and Tanzania and bringing forward the voices of African researchers and academics, the book highlights the importance of context in defining how habits and practices of citizenship are constructed and understood within communities. The book demonstrates how conceptualizations derived from philosophical pragmatism facilitate identification of the dynamics of incremental change in citizenship. It also provides a definition of learning as reformulation of habits, which helps to understand the difficulties in promoting change. This book will be of interest to scholars within the fields of development, governance, and educational philosophy. Practitioners and policy-makers working on inclusive citizenship and interventions to strengthen civil society will also find the concepts explored in this book useful to their work. Effortlessly defying and calling into question time and space, Maya inhabits fantastical realities filled with shamans, romantic longing, a daughter s struggles, and a flying dragon. Lyrically flowing between Maya s multiple realities, The Original Dream is the story of a young independent Indonesian woman trying to break free from cultural and social conventions while also searching for her place among family and friends. With guidance from her parents, coworkers, and sister, along with a newborn filled with the wisdom of elders, Maya navigates her perceptions, looking for answers to unknown questions. Whether soaring through the nighttime sky, caring for her nephew, or tending to guests at the hotel where she works, she tries to delineate the difference between dreams and reality and if such a difference even matters. " Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
