Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, Vox "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world. Each of these eleven (11) print volumes contains the transcripts of Congressional investigative questioning and testimony of key personnel as part of the Select Committee on the Events Surrounding the 2012 Terror Attack in Benghazi's investigation into the attacks on U.S. diplomatic facilities in Benghazi in September 2012 and related matters pursuant to House Resolution 567 of the 113th Congress and House Resolution 5 of the 114th Congress. A transcribed interview before this committee is not bound by the rules of evidence. Each person was informed that the individual may consult with their counsel during the interview and an official court reporter transcribed each interview. Some of the information in this report is "blacked out" as it may pertain to classified information or for protection of the person providing the testimony. Each person is asked the same questions relating to the handling of the situation as it pertains to former Secretary of State, Hillary Clinton and her role surrounding these events. Lastly, many of the interviews refer to specific Exhibits or documents for which the person answering the questions is requested to provide background information. Each of these exhibits that serve as primary source and historical documents are included within each volume. Highlights from Liquid Products, Volume Three include: practical details into Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken economy—laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason—is wide open. Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab—the Founder and Executive Chairman of the World Economic Forum—looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope, including: Individual agency: how countries and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and—country by country, company by company, and citizen by citizen—glue them back together in a way that benefits us all. These new, global criminal alliances combine tech-savvy radical extremists and the local knowledge and manpower of U.S.-based gangs creating a greater potential for biological attacks. As a result, both law enforcement and intelligence agencies have been forced to align their coordination efforts to a greater extent with colleges, universities, private infrastructures, and the military to shift national security efforts from reactive to proactive. D. Darell Dones examines the parallel terrorist-gang activities and prevailing psychosocial factors that explain the varying radical beliefs, causations, and behavioral mindset of these criminal partnerships. Indian multinationals have been active in the world economy since early 1960s. However, their number and scale of operation have grown significantly in the last fifteen years or so. In the face of increasing global competition unleashed by extensive liberalization measures, Indian firms have adopted the strategy of outward foreign direct investment (OFDI) as an integral part of their business strategies. By undertaking greenfield OFDI and brownfield OFDI for acquiring foreign companies, Indian firms are enhancing their potential for growth and global competitiveness. Consequently India has emerged as a major developing source country of FDI and Indian multinationals are likely to affect world development in several ways. The book analyses the phenomenon of Indian multinationals from both macro level factors and firm-level corporate strategies and examines its implications for India and host countries. A detailed investigation of Indian overseas investment flows and stocks from sectoral, regional, ownership and motivational perspectives provides a rigorous long-run coverage of Indian multinational firms from 1970s onwards. The role of innovation, entrepreneurial skills, scale of business, productivity, and the role of government policies, received critical attention in explaining the emergence of Indian multinationals. The comprehensive quantitative and case studies approach offers valuable insights into the behaviour and impacts of these new global actors on home and host countries. This book offers a number of lessons to home country, host countries, and Indian enterprises becoming multinationals. With the growing global interest from policy makers, business practitioners, researchers, and students in Indian multinationals, this book would serve as an important and timely reading for all of them. Written by a religious historian, this is an introduction to early Christian thought. Focusing on major figures such as St Augustine and Gregory of Nyssa, as well as a host of less well-known thinkers, Robert Wilken chronicles the emergence of a specifically Christian intellectual tradition. In chapters on topics including early Christian worship, Christian poetry and the spiritual life, the Trinity, Christ, the Bible, and icons, Wilken shows that the energy and vitality of early Christianity arose from within the life of the Church. While early Christian thinkers drew on the philosophical and rhetorical traditions of the ancient world, it was the versatile vocabulary of the Bible that loosened their tongues and minds and allowed them to construct the world anew, intellectually and spiritually. These thinkers were not seeking to invent a world of ideas, Wilken shows, but rather to win the hearts of men and women and to change their lives. Early Christian thinkers set in place a foundation that has endured. Their writings are an irreplaceable inheritance, and Wilken shows that they can still be heard as living voices within contemporary culture. The Class of 1965 entered the Military Academy in July 1961. As cadets, they received a traditional West Point education but also studied new fields such as computers and nuclear physics. Upon graduation, members of the class received numerous national scholarships, including one Rhodes scholarship. During the Vietnam War members of the class received no less than one Medal of Honor, four Distinguished Service Crosses, one Air Force Cross, 94 Silver Stars, 5 Soldier's Medals, 175 Bronze Stars with V device for valor, and 129 Purple Hearts. In later years, members of the class served with distinction in Grenada, Panama, Iraq, and elsewhere. They became leaders in transforming the army after the Cold War into a much leaner, more agile, technologically advanced force. Those who left the service, whether after four years in uniform or more, contributed to the nation in a similarly impressive manner. As civilians they excelled in numerous fields and exhibited as much patriotism and "Strength and Drive" as those still in uniform. Whether in uniform or not, members of the class of 1965 served their communities and nation and never lost sight of the meaning of West Point's motto: "Duty, Honor, Country." The Common Good: Rising of a New Dawn will forever change how you see your neighbor. On this captivating spiritual journey through America, hear the stories of how ordinary people—people in the trenches devoted to the common good—are making an extraordinary difference in the lives of many. With passion, wit, and wisdom, Juanita Farrow discusses business, politics, and religion, and paints a compelling picture of how the common good is God's desire for America, and why it's good for America. Juanita Farrow states, "We live in a great country, but far too often we allow our beliefs and egos to divide us in ways that become a form of paralysis that impacts the entire nation." Explore how the people in our lives and the experiences of our journey begin to shape our decisions and our view of the world. The Common Good speaks to people of faith and nonbelievers, and challenges everyone to look within for authentic purpose. It looks at pressing issues for Americans, but also the rising of a new dawn. Building the bridges to transcend differences will require a lot of heart. Creating a movement for the common good will be difficult, but even businesses, for instance, have found social entrepreneurship not only solves problems around the world, but is good for the bottom line.

The Common Good describes how living a more conscious life can heal a nation—one heart, one mind, one thought at a time. A message of hope on how to turn fear into love, it can leave you feeling truly empowered—and inspired to make a difference. In Thrive, Arianna Huffington makes an impassioned and compelling case for the need to redefine what it means to be successful in today's world. Arianna Huffington's personal wake-up call came in the form of a broken cheekbone and a nasty gash over her eye—the result of a fall brought on by exhaustion and lack of sleep. As the cofounder and editor-in-chief of the Huffington Post Media Group—one of the fastest growing media companies in the world—celebrated as one of the world's most influential women, and gracing the covers of magazines, she was, by any traditional measure, extraordinarily successful. Yet as she found herself going from brain MRI to CAT scan to echocardiogram, to find out if there was any underlying medical problem beyond exhaustion, she wondered is this really what success feels like? As more and more people are coming to realize, there is far more to living a truly successful life than just earning a bigger salary and capturing a corner office. Our relentless pursuit of the two traditional metrics of success—money and power—has led to an epidemic of burnout and stress-related illnesses, and an erosion in the quality of our relationships, family life, and, ironically, our careers. In being connected to the world 24/7, we're losing our connection to what truly matters. Our current definition of success is, as Thrive shows, literally killing us. We need a new way forward. In a commencement address Arianna gave at Smith College in the spring of 2013, she likened our drive for money and power to two legs of a three-legged stool. They may hold us up temporarily, but sooner or later we're going to topple over. We need a third leg—a third metric for defining success—to truly thrive. That third metric, she writes in Thrive, includes our well-being, our ability to draw on our intuition and inner wisdom, our sense of wonder, and our capacity for compassion and giving. As Arianna points out, our eulogies celebrate our lives very differently from the way society defines success. They don't commemorate our long hours in the office, our promotions, or our sterling PowerPoint presentations as we relentlessly raced to climb up the career ladder. They are not about our resumes—they are about cherished memories, shared adventures, small kindnesses and acts of generosity, lifelong passions, and the things that made us laugh. In this deeply personal book, Arianna talks candidly about her own challenges with managing time and prioritizing the demands of a career and raising two daughters—of juggling business deadlines and family crises, a harried dance that led to her collapse and to her "aha moment." Drawing on the latest groundbreaking research and scientific findings in the fields of psychology, sports, sleep, and physiology that show the profound and transformative effects of meditation, mindfulness, unplugging, and giving, Arianna shows us the way to a revolution in our culture, our thinking, our workplace, and our lives.
