Basic concepts of fluids and fluid flow are essential in all engineering disciplines to get better understanding of the courses in the professional programmes, and obviously its importance as a core subject need not be overemphasised. Human-like, but not human, the nara ruled Tanyrin for centuries. The most feared among them were their naragi, sorcerers whose power was all but invincible. Not until the coming of Arami Lothlain, King of Tanyrin and Blessed of Loth, did the rein of the nara come to a bloody end. For four hundred years afterwards, the land was at peace. Stefn Eldering was the youngest son of the Earl of Shia, the last in a long, proud line of demon hunters. He was also a sin-catcher, living proof of God's displeasure, the shame of his existence atonement for the sins of his ancestors. Michael Arranz was the son of a duke and one of the despised h'naran, half-bloods cursed with the blood of the nara running through their veins. Of all the h'nara, his family alone was immune from the persecution of the powerful Church of Loth, protected by an ancient covenant. In ordinary times, the paths of Michael and Stefn would never have crossed. Alas, times were no longer ordinary. The latest of the Lothlain kings was a weakling, unable to curb the ambitions of an increasingly powerful, corrupt clergy. Famine stalked the land. Fear of the h'nara, fanned by the Church, spread tentacles everywhere. Tanyrin teetered on the edge of chaos. A loyal and devoted friend to Tanyrin's crown prince, Michael could refuse Severyn Lothlain nothing, not even when Severyn asked the unspeakable of him. Determined to wrest the throne from his brother, Severyn intended nothing less than the resurrection of the ancient naragi. Michael, whose naran blood was the purest in Tanyrin, was the logical choice. But for Michael become what mankind feared most, he needed a conduit through which to take the powerful, dangerous magic of the Dark Stream. He needed a man who carried the ancient blood of the cethera. He needed Stefn Eldering. Journal, "Favorite Books of the Year 2013" Cosmopolitan, "Best Books of the Year for Women" Library Journal, "Best Books of 2013" Salon, "Best Books of 2013" "Haunting... more than a beautifully written memoir. [A] powerful and raw love letter."—The Washington Post A blazingly passionate memoir of identity and love: when a charismatic and troubled young woman dies tragically, her identical twin must struggle to survive Christa Parravani and her identical twin, Cara, were linked by a bond that went beyond siblinghood, beyond sisterhood, beyond friendship. Raised up from poverty by a determined single mother, the gifted and beautiful twins were able to create a private heaven of splendor and merriment between themselves and then earn their way to a prestigious college and to careers as artists (a photographer and a writer, respectively) and to young marriages. But, haunted by childhood experiences with father figures and further damaged by being raped as a young adult, Cara veered off the path to robust work and life and in to depression, drugs and a shocking early death. A few years after Cara was gone, Christa read that when an identical twin dies, regardless of the cause, 50 percent of the time the surviving twin dies within two years; and this shocking statistic rang true to her. "Flip a coin," she thought, "those were my chances of survival." First, Christa fought to stop her sister's downward spiral; suddenly, she was struggling to keep herself alive. Beautifully written, mesmerizingly rich and true, Christa Parravani's account of being left, one half of a whole, and of her desperate, ultimately triumphant struggle for survival is informative, heart-wrenching and unforgettably beautiful. In a post-apocalyptic America that has shattered into a hundred perpetually warring fiefdoms, anyone with a loud voice and a doomsday weapon can be king (and probably has been). Duncan Archer—con man, carpetbagger, survivor—has found a way to somehow successfully navigate the end of the world, with its giant killer robots, radioactive mutants, mad scientists, rampant nanotechnology, armed gangs, sea monsters, and 101 unpleasant ways to die. But when he meets Captain James Barrow, a former OSS agent and the most wanted man in the world, Duncan finds himself a reluctant hero caught up in a whole new level of weird, rollicking adventure... And the second most wanted man in the world. Tales from the Radiation Age is a throwback to the pulp-origins of science fiction, painting a vision of the future that's richly detailed, wildly imaginative—and altogether too easy to imagine. With more detailed coverage of the financial and economic crisis than any other principles text on the market, Roger Arnold's PRINCIPLES OF ECONOMICS, 10e, International Edition opens up the world of economic analysis for your students with fun and innovative pedagogy and intriguing examples. Deciding when to work on a relationship and when to walk away is a skill that can prevent us wasting months and even years of our lives on partners that will never make us truly happy. Once we have learned to identify the deal breaker in a relationship we can empower ourselves to action, and then change and improve our lives. Whereas books like 'He's Just Not That Into You' explored relationship troubles in black and white, 'Deal Breakers' covers all the shades of grey that lie in between - all those areas where relationships can hit an impasse. Some deal breakers are easy to identify - one partner wants marriage, the other doesn't - yet many are more subtle and difficult to pinpoint. Dr Bethany Marshall is a relationships expert. She has identified specific male archetypes and the traits that frustrate and infuriate their partners. Here, for the first time in book form, is advice that can help any woman who is trying too hard to make her relationship work. If you're a tech company, the most dramatic effect of megatrends like cloud computing, managed services, and the rise of consumer technology won't be felt in your company's product line. The true disruption will be to your business model. Future customers won't want to pay you high prices out of big "CapEx" budgets anymore. They will expect lower "cloud" prices paid from "OpEx" budgets only when and if they successfully consume the business value of your products. How your company reacts to this risk shift could either accelerate the commoditization of your products or lead you to a new stage of profitable growth. For the first time, the tools are on the table to truly eliminate barriers of cost and complexity created by the last generation of tech. Consumption Economics is the owner's manual for tech company executives who want to drive their company successfully into the next one. Asymptotic methods provide considerable physical insight and understanding of diffraction mechanisms and are very useful in the design of electromagnetic devices such as radar targets and antennas. However, difficulties can arise when trying to solve problems using multipole and asymptotic methods together, such as in radar cross section objects. This new book offers a solution to this problem by combining these approaches into hybrid methods, therefore creating high demand for both understanding and learning how to apply asymptotic and hybrid methods to solve diffraction problems. The book provides the very latest and most comprehensive research on this subject. A male prostitute, a mangy cat, a murder and an obsession that threatens his career, his impending marriage and his life. Nothing is going as planned for Austin Glass. Austin Glass seems to have it all, A loving fiancée, a future with the FBI and a healthy sized trust fund. At least on the surface. He also has a grin and a wisecrack for every situation. But the smile he presents to the world hides a painful past he's buried too deeply to remember, and his quips mask bitterness and insecurity. Austin has himself and most of the whole world fooled-until he meets a redhead in a pair of bunny slippers. As events unfold in the biggest case of his life, Austin's carefully planned future unravels, and he finds himself pushed into making quick, life-changing decisions. But can he trust himself or anything he feels, when each event seems to be just a series of volatile reactions? When it comes to knitting, who knows better than our nan? If you get tangled in a ball of wool, she's always the first person you call to help you sort your cross stitch from your cable. While recruiting for her fledgling online knitwear company, Katie Mowat swiftly realised that it was mainly older women, namely grannies, who were volunteering their services, and so Grannies Inc. was born. Since 2009 they have gone from strength to strength, and from one product (beanies), they now design and produce a whole range of knitwear. Her crack squad of 15 grannies will be contributing their 'purls' of wisdom and patterns to help the new knitting generation in this attractive book. With knitting patterns for snoods, legwarmers, slouch socks, laptop cases and beanies, you'll be cool and cosy in no time. As the grannies say, 'May your bobbin always be full.'
