A New York Times bestseller and a "Best Thriller of the Year" Winner of the Goncourt Prize and now an international phenomenon, this dizzying, whip-smart novel blends crime, fantasy, sci-fi, and thriller as it plumbs the mysteries surrounding a Paris-New York flight. Who would we be if we had made different choices? Told that secret, left that relationship, written that book? We all wonder—the passengers of Air France 006 will find out. In their own way, they were all living double lives when they boarded the plane: Blake, a respectable family man who works as a contract killer. Slimboy, a Nigerian pop star who uses his womanizing image to hide that he's gay. Joanna, a Black American lawyer pressured to play the good old boys' game to succeed with her Big Pharma client. Victor Miesel, a critically acclaimed yet largely obscure writer suddenly on the precipice of global fame. About to start their descent to JFK, they hit a shockingly violent patch of turbulence, emerging on the other side to a reality both perfectly familiar and utterly strange. As it charts the fallout of this logic-defying event, *The Anomaly* takes us on a journey from Lagos and Mumbai to the White House and a top-secret hangar. In Hervé Le Tellier's most ambitious work yet, high literature follows the lead of a bingeable Netflix series, drawing on the best of genre fiction from "chick lit" to mystery, while also playfully critiquing their hallmarks. An ingenious, timely variation on the doppelgänger theme, it taps into the parts of ourselves that elude us most. A micro-preemie fights for survival in this extraordinary and gorgeously told memoir by her parents, both award-winning journalists. Juniper French was born four months early, at 23 weeks' gestation. She weighed 1 pound, 4 ounces, and her twiggy body was the length of a Barbie doll. Her head was smaller than a tennis ball, her skin was nearly translucent, and through her chest you could see her flickering heart. Babies like Juniper, born at the edge of viability, trigger the question: Which is the greater act of love -- to save her, or to let her go? Kelley and Thomas French chose to fight for Juniper's life, and this is their incredible tale. In one exquisite memoir, the authors explore the border between what is possible and what is right. They marvel at the science that conceived and sustained their daughter and the love that made the difference. They probe the bond between a mother and a baby, between a husband and a wife. They trace the journey of their family from its fragile beginning to the miraculous survival of their now thriving daughter. This is a rich and path-breaking comparative study of reading tastes in the final years of old regime Europe. Based on extensive research in the account books of the Swiss publishers, the Société Typographique de Neuchâtel (STN), and related archives, it charts the dissemination of literature and reading tastes across Europe in the years leading up to the French revolution. In the process, it recasts our understanding of late 18th-century print culture and the contours of the enlightenment. The fruit of a widely acclaimed five year database project, the STN database, it is also a story of pioneering efforts to apply the latest digital technology and GIS mapping techniques to traditional historical and bibliographic problems. Although written to serve as a standalone study, this book is ideally complemented by its companion volume, Mark Curran's *The French Book Trade in Enlightenment Europe I: Selling Enlightenment*, which offers a radical reinterpretation of the structure and practices of the European book trade. The STN database is now recognised as a cutting-edge digital project of global significance. Robert Darnton has called it "a prodigious accomplishment and a joy to use" while Jeremy Popkin adds, "No one working in the field of French Enlightenment studies ... can afford to ignore the rich mine of data that Simon Burrows and his collaborators have made accessible, in an eminently usable form, and the new possibilities it opens up for scholars." *The French Book Trade in Enlightenment Europe I and II* offer a roadmap of that data and what it can show us. Vols. for 1898-1968 include a directory of publishers. Organized by subject, this *Eyewitness Phrase Book* contains everyday phrases, public transportation, shopping, and hotels. Includes an extensive menu guide listing approximately 600 dishes. The book as the subject of a distinct historical discipline dates from the landmark publication of *L'Apparition du livre* by Lucien Febvre and Henri-Jean Martin in 1958. In this further contribution to his pathbreaking work with Febvre, eminent French historian Henri-Jean Martin explores the role of the book and book industry in early modern France. Martin begins with a sweeping look at the revolutionary role played by the new technology of printing in Europe of the Renaissance and Reformation. Shifting the focus to France, he then examines the political implications of publishing in the reign of Francis I, including such topics as the founding of royal and university libraries, the role of church-state relations, Richelieu's cultural program, and censorship. In revealing case studies of Rouen and Grenoble, Martin pinpoints precisely which books were sold and to which social groups, and explains why the initially successful printers of Rouen were eventually forced out of business by the Parisian courts. Martin also casts a discerning eye on early graphic design—from the first illustrated "coffee table" books purchased by the newly rich to the invention of the paragraph to facilitate reading. And he shows how attempts by the French government to suppress and control publication were eventually thwarted by free market forces from Amsterdam and Neufchatel. This is a book that will be of interest to those who study the history of the book, intellectual history of early modern Europe, and the relation between politics and ideas. Olá! A series of linked studies of European print culture of the sixteenth century, focusing particularly on France and the regional, provincial experience of print. When France Was King of Cartography investigates over a thousand maps and nearly two dozen map producers, analyzes the map as a cultural artifact, map producers as a group, and the array of map viewers over the course of two centuries in France. The book focuses on situated knowledge or 'localized' interests reflected in these geographical productions. Through the lens of mapmaking, it examines the relationship between power and the practice of patronage, geography, and commerce in early modern France.
